

Let's Serve Humanity

Presented By:

Sheikh Haris Khalid (sp17-bsse-0046)

M.Abdullah Waseem (sp17-bsse-0060)

The main problem in serving humanity?

Problem 1

People who are in dire need of help don't know who and how to approach to fulfill their needs.

Problem 2

Due to beggar mafia most of the time genuine needy people will be ignored.

Problem 3

Doubts whether the donated amount is hand over to the right person or not.

Existing Application's Problem

Problem 1

Some applications only had a list of categories with no detail of cases.

Problem 2

Some applications had the cases but no progress of how things are going.

Problem 3

Some applications only maintain and show the record of donation.

Benefits of our Application

Solution 1

A software with time-saving automation

Solution 2

Keep all cases info in one easy-to-access place with auto-synced case details

Solution 3

Easy to donate via bank account, easy paisa or jazz cash with completed case details which provide Inner satisfaction that your donation is in good hands

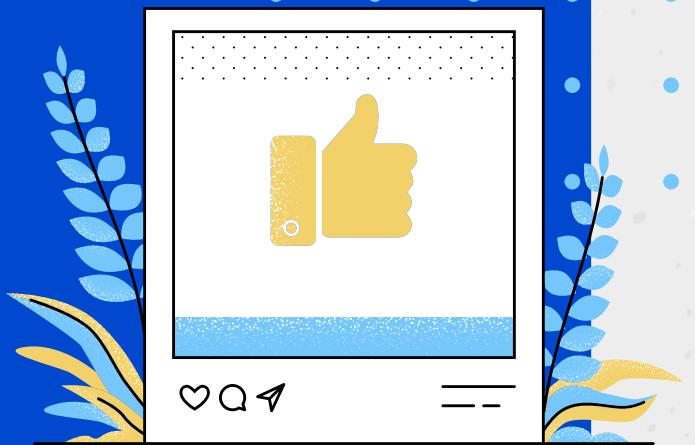

Targeted Audience

The target audience contains those who finds difficult to arrange money for wedding, school fees, house rent, etc.

Donors (who will donate the money through this application)

Needy People (Those people who need help)

The management team of LSH/Admin (who can approve or reject a case and update the details of the cases daily)

For Donors

Those who want to donate using our application.

Donors need to create their accounts if they want to use the application for donations.

Donors can find the cases on the front page based on the priority.

Donors can donate in more than one category and cases also.

Donors can also select the category in which they want to donate their money.

Donors can contact the management team and give feedback to the application.

Donors can see the target amount, collected amount, and the time duration of the case.

For Needy people

Those who want donation
using our application.

Needy people need to create their accounts if they want to upload a case.

Needy people can post a case according to their needs.

Needy people will fill a form that includes the details about the case.

Needy people can contact the management team of LSH using the application.

Management Team of LSH (admin)

Those who can approve or reject a case and update the details of the cases.

The management team will receive the form filled by needy people.

The management team can track the status of a case and keep updating it.

The management team can record donors and their donation to each case.

The management team can arrange the cases based on their priority on the home screen.

The management team can verify the cases of needy people before approving or rejecting any case and only the approved cases appear on the home screen.

List of Deliverable

The needy people can post the case with details and After the verification the admin has rights to approve or reject the case.

The approved cases are arranged by priority by admin.

Donor will be able to casually donate or donate to a specific case and have multiple ways to donate amount using bank account, easy paisa and jazz cash.

Project Constraints

Constraint 1

Internet downfall can cause the application to slack.

Constraint 2

Not all systems are well built, the old technology systems have a slow response time.

Constraint 3

Mobile applicants can face application malfunctions depending on their mobile type, this might limit its effectiveness.

System Features

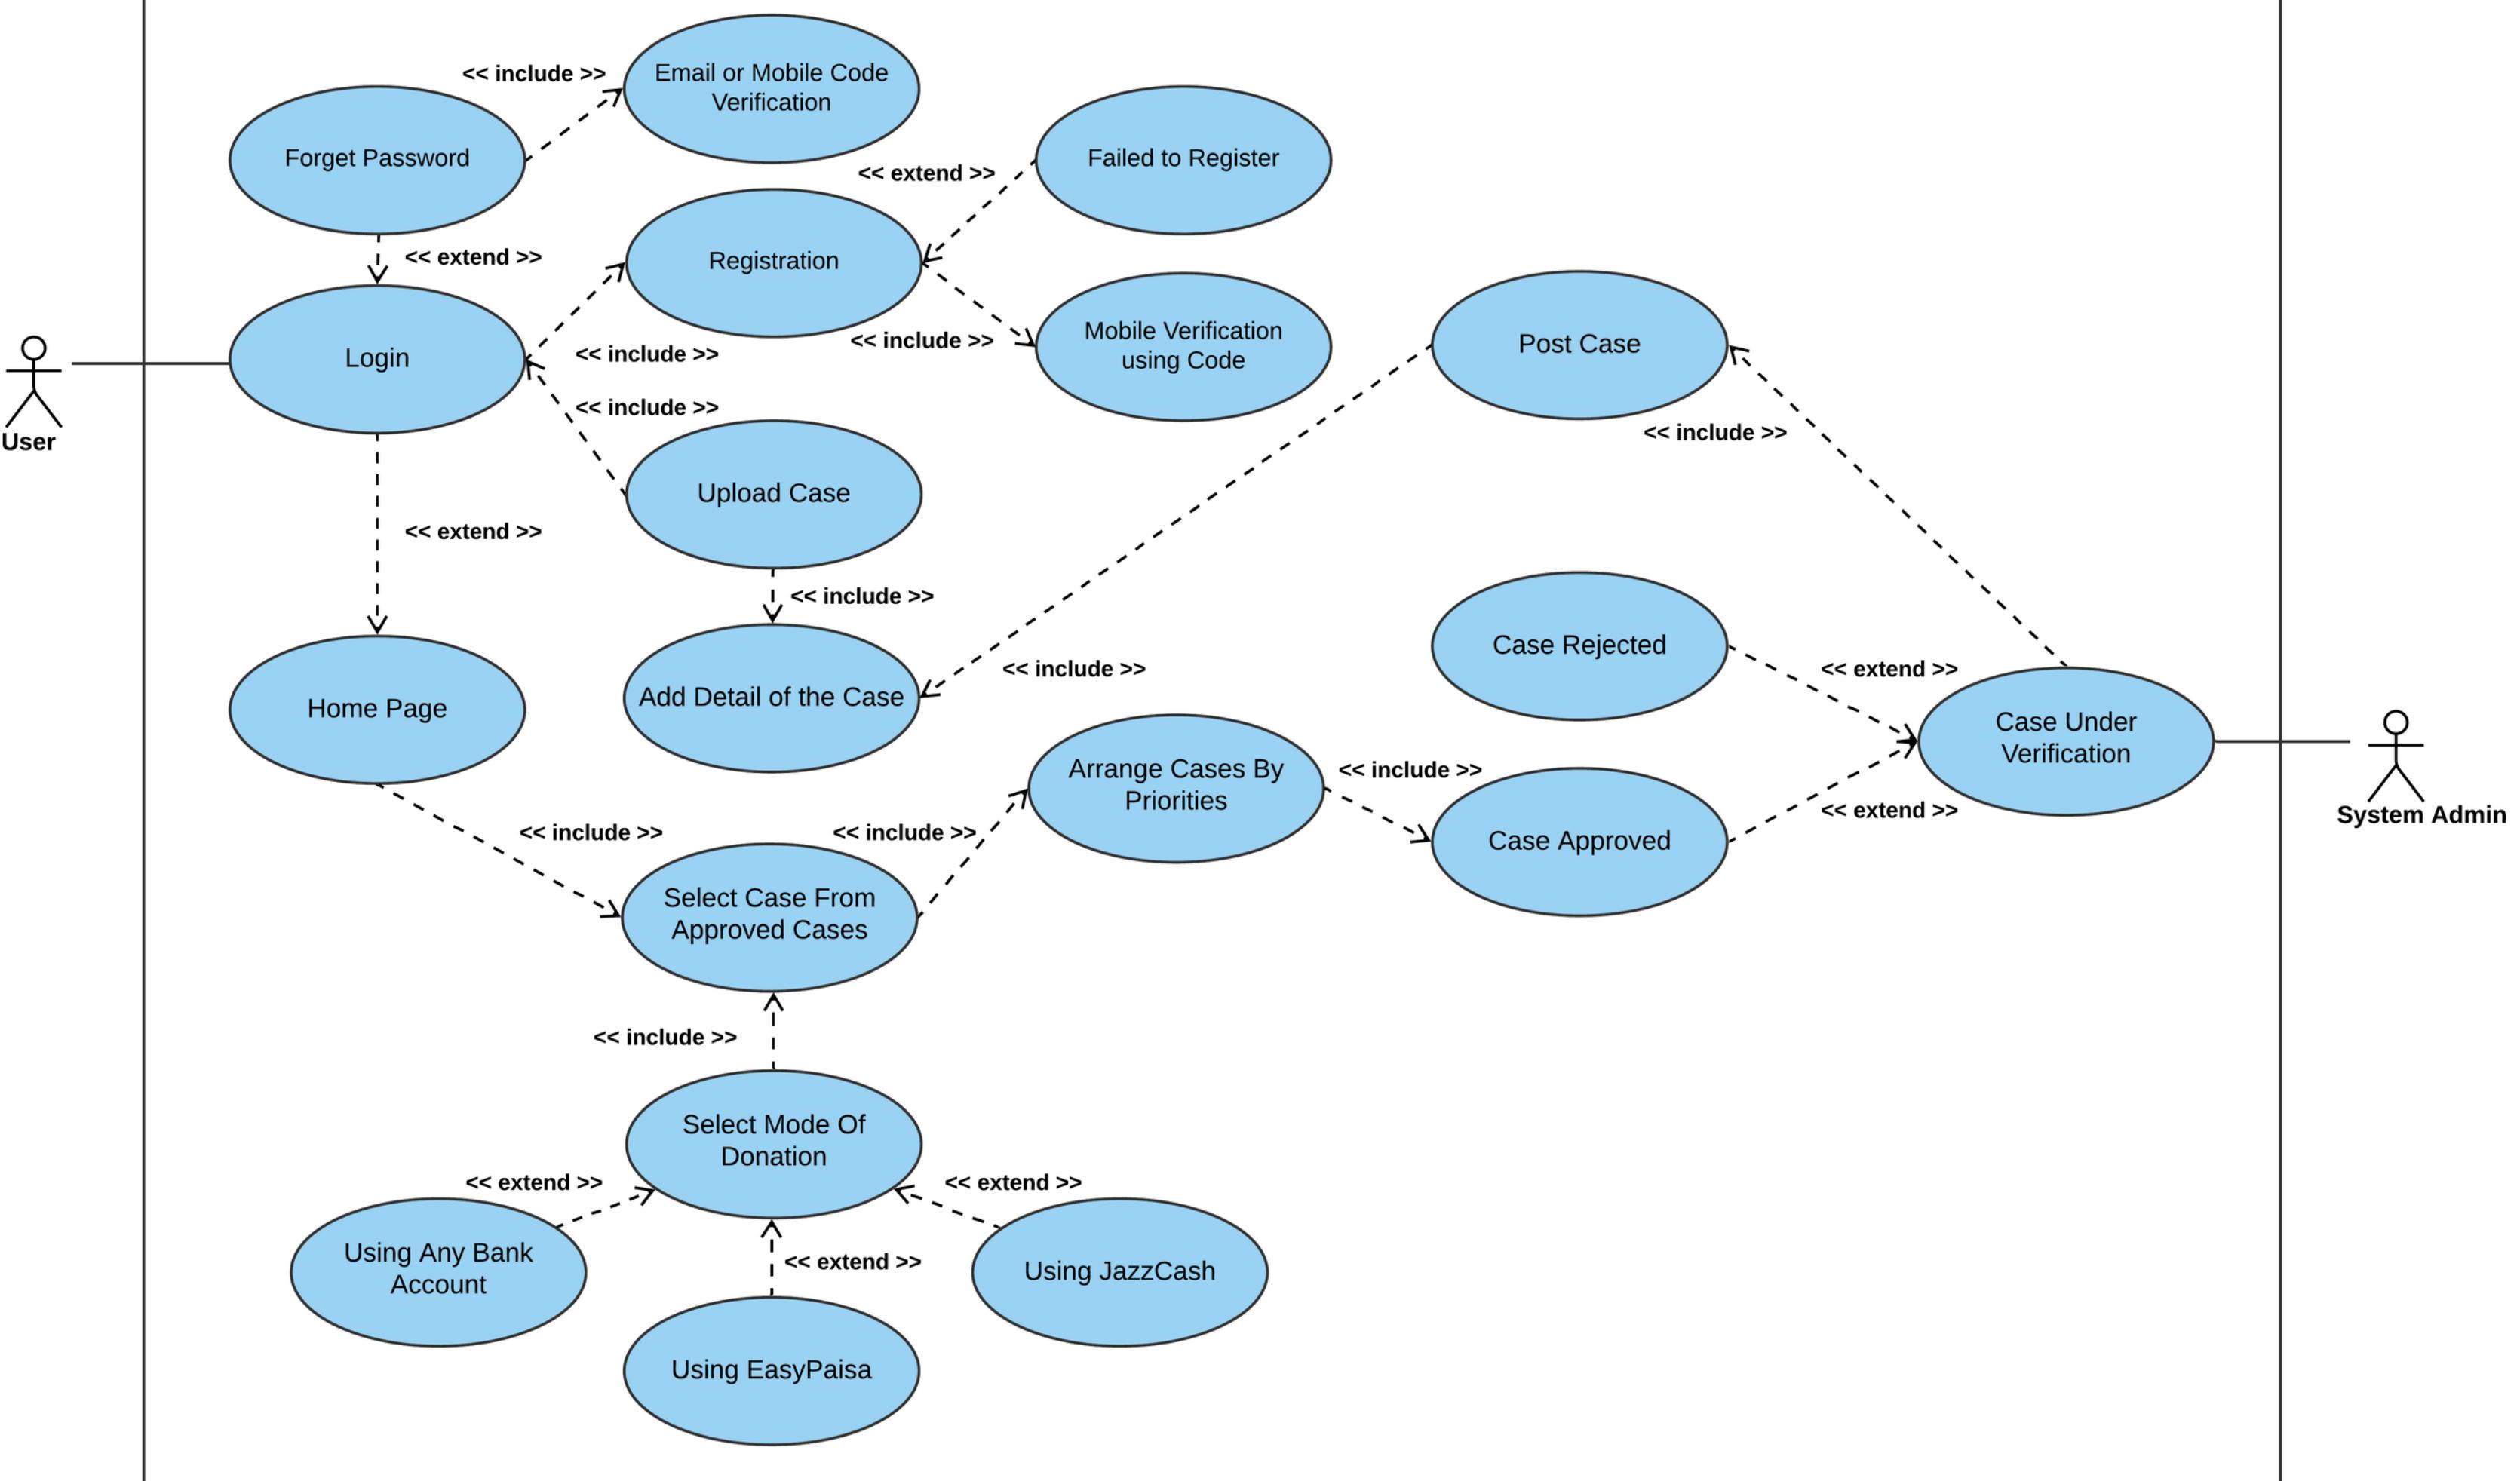

There shall be a login system for users and a backend for admin which is required for verification, update cases etc.

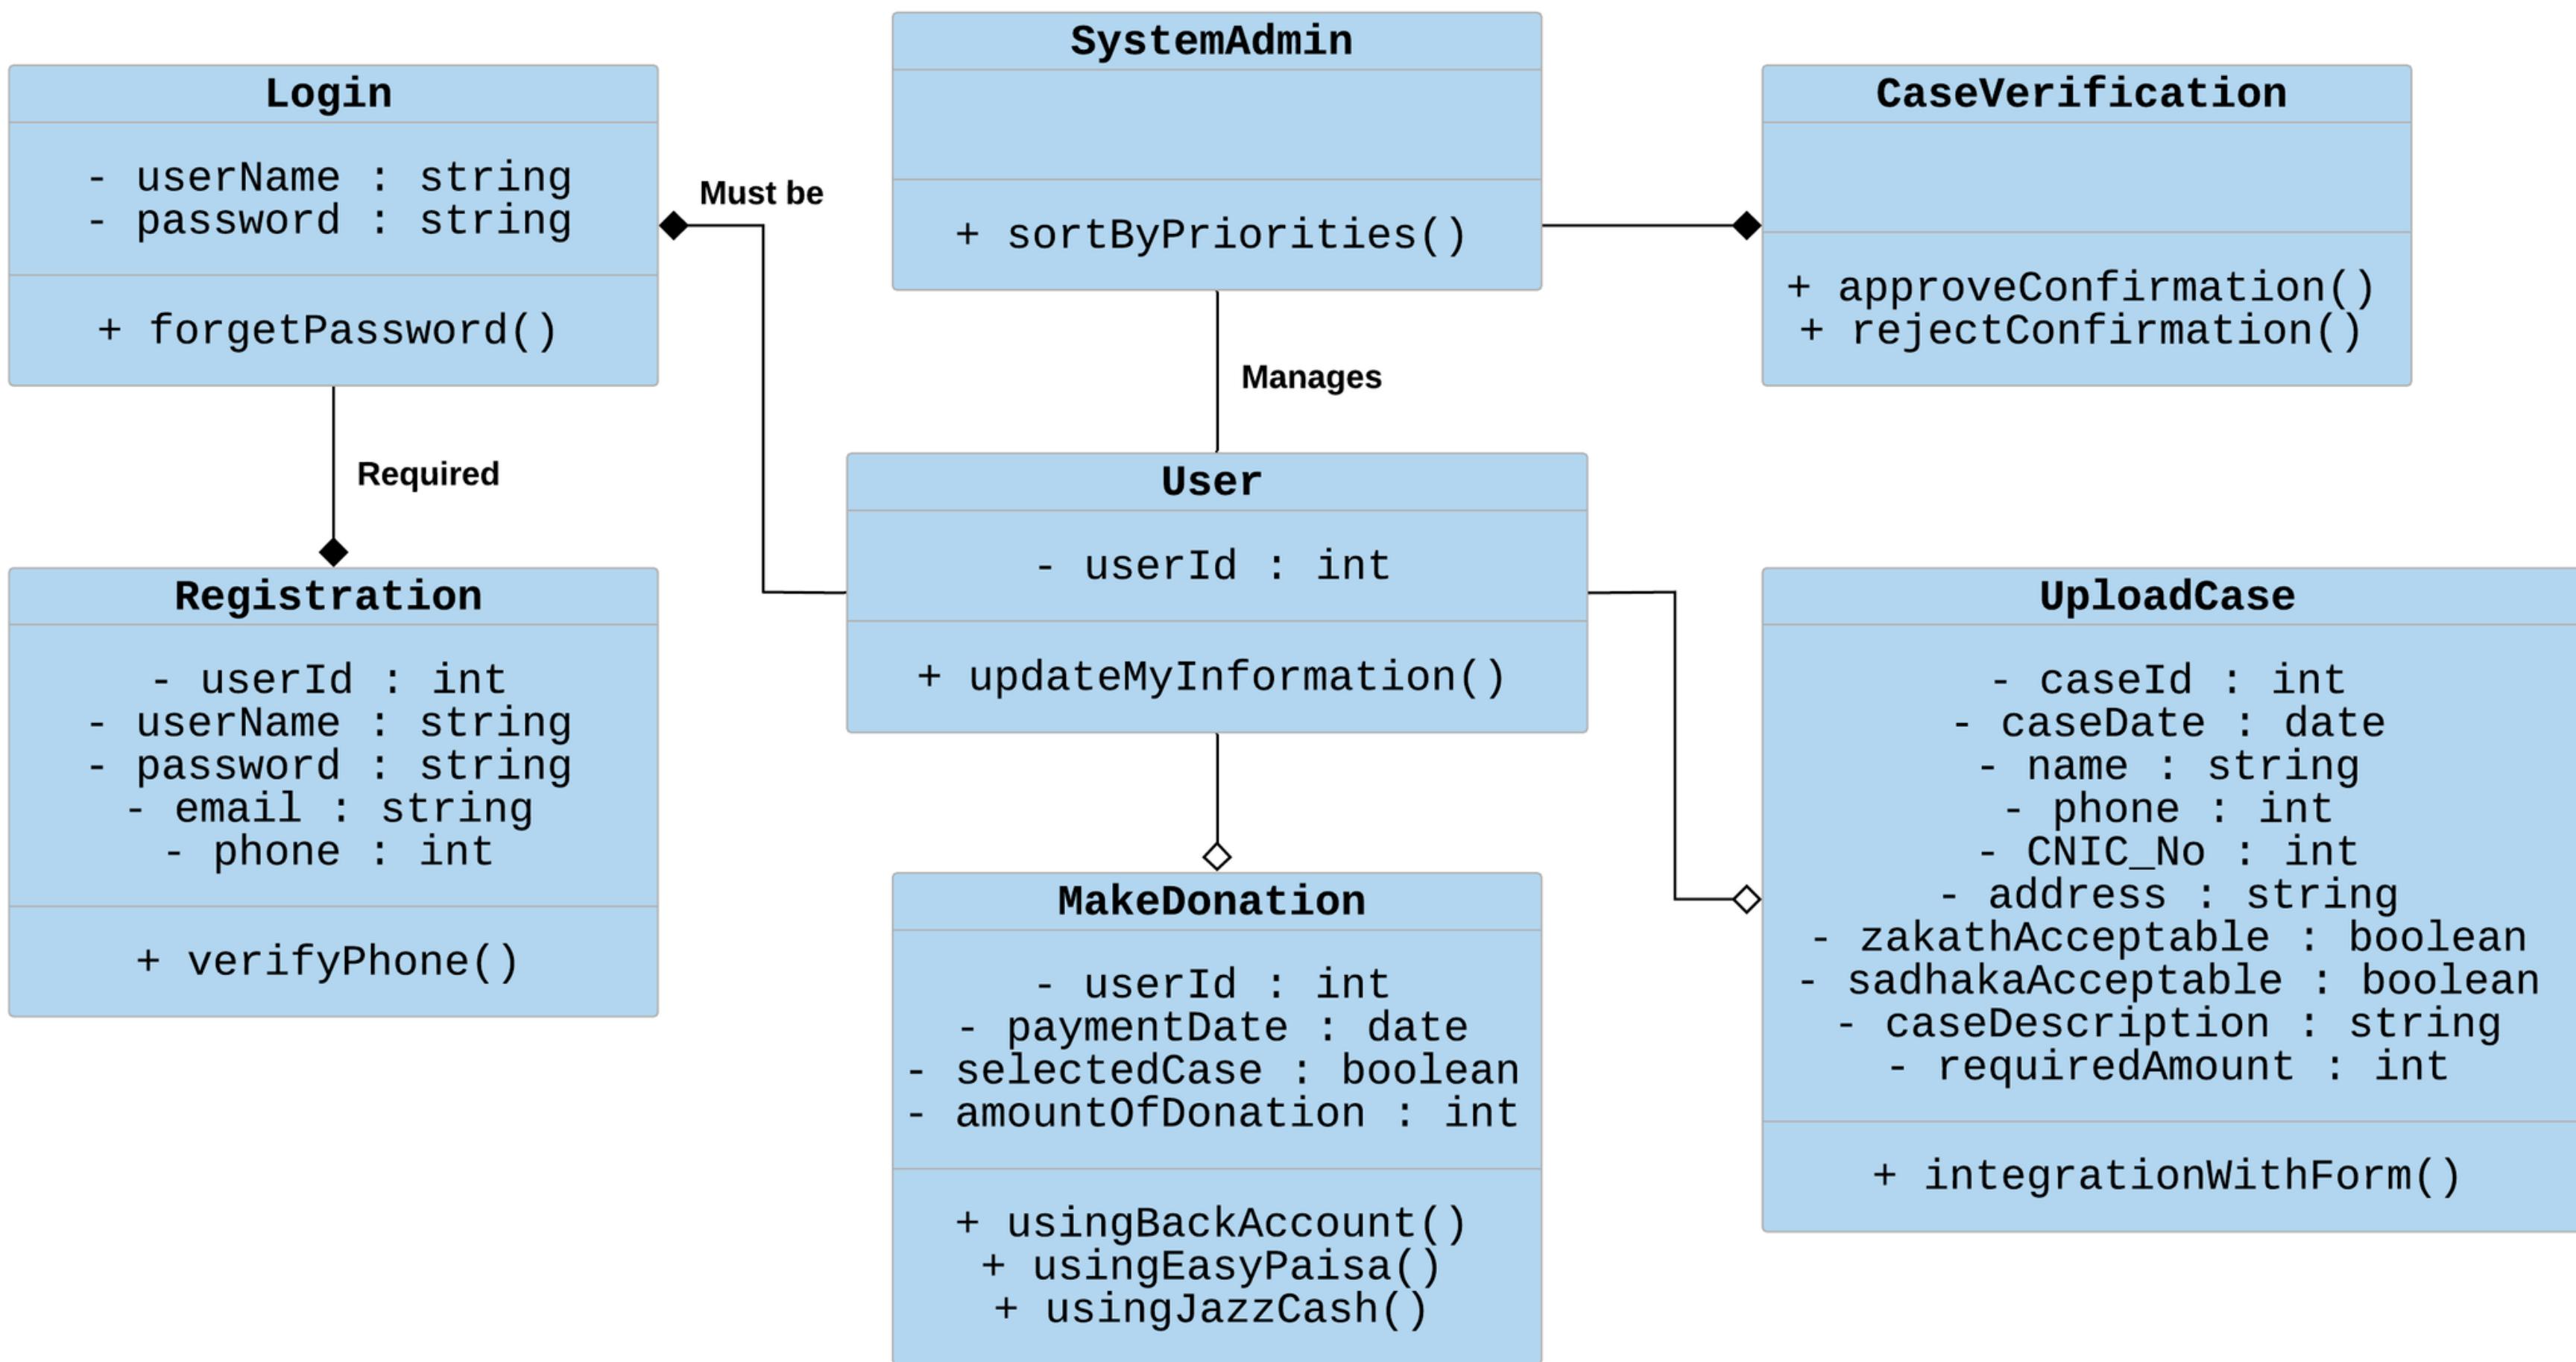

User shall be able to casually donate or donate to specific case with different payment methods.

The home page of application contains all the current cases which are arranged priority wise, the priority will keep on changing according to the cases and seasons and by clicking on any it case will give the detail of the case.

About Us

* Let's Server Humanity (LSH) is a non - profit charitable organization which is an initiate of Muhammad Ali Jinnah University students.

* This project has been taken by experiencing the difficulties faced by the people while searching the needy peoples. A lot of people who are willing to help the needy people are unable to distinguish them which is the main problem. Also, some needy people need help, but they don't know what to do and who to contact. If we talk only about Karachi there are a lot of people who need help, be it financial or any other form, but they are being a common man, so their voice is not raised to the concerned authorities.

* We are in a digital era where information travels at the speed of light. When thoughts can travel at lightning speed, why not deeds. We do observe and have experienced the movement of goods and services by the click of a button.

* Time and people are in a vicious cycle, we blame time for our short comings and time has played havoc in the life of few and brought inlimitless happiness in many others.

* Our application will help you reach that identified deserving needy at the click of a button.

Future Work

Web portal will also build for this application.

Users can donate old/new clothes and books using this application.

Blood group also collected on registration, in case of emergency the application will send immediate message or call to the nearest blood donor.

Thank You
